Simple. Practical. Fair.

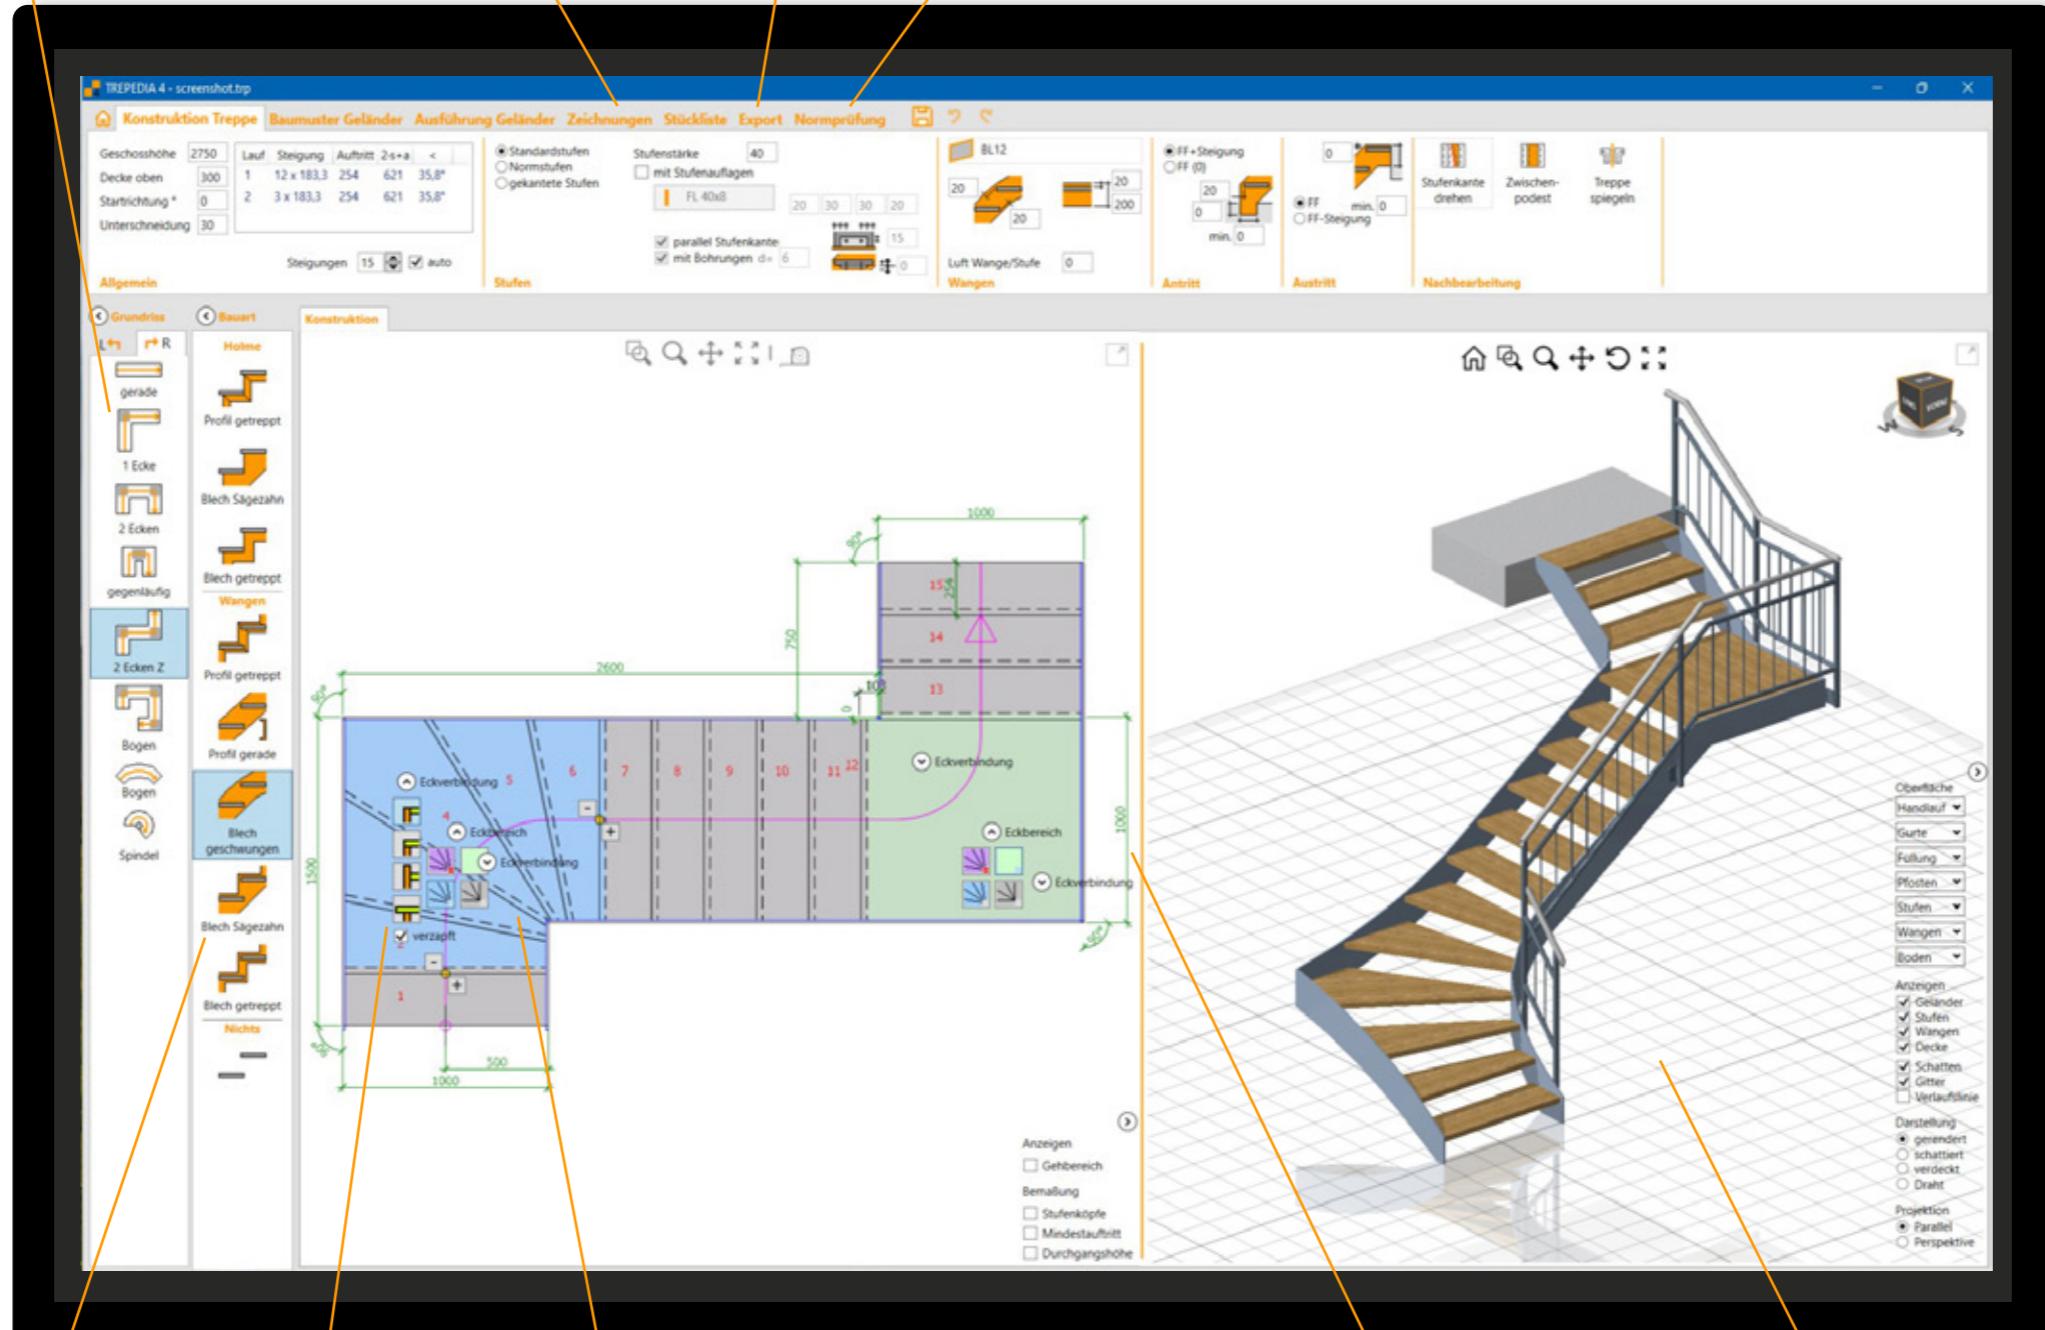

All common layouts for building and industrial staircases

Fully dimensioned printouts in just a few minutes

2D and 3D export in DXF / DWG, plus volume data in IGES / STEP or IFC

Standard compliance check according to DIN 18065 or DIN EN ISO 14122-3

Large selection of construction types in sheet metal or profiles

Extensive options for corner connections

Corners can be designed as platform landings or winder stairs

Click on a dimension, change the value, and the staircase recalculates automatically

Realistic 3D visualization for inspection and quotations

Extremely easy to use – no training or CAD knowledge required
